MEMORANDUM FOR: [redacted]
Chief, Security Equipment Support Division, OS

25X1

FROM: [redacted]
Chief, New Building Project Office, OL

SUBJECT: Security Conduit Requirements

REFERENCE: Memo for C/NBPO/OL from C/SESD, dtd 9 Feb 1987, same subject

1. In response to your request for barrier conduits, we have forwarded a requirement to the Bid Package 4 Contractor to install hydraulic vehicle barrier conduits at the Route 123 Visitor Control Center (VCC). The conduits should be in place within the next few weeks. Please be aware that the Bid Package 4 Contractor is currently working on the George Washington Memorial Parkway (GWMP) VCC and has requested your vehicle barrier conduit requirements for that location. Please provide your conduit requirements for the GWMP VCC by 23 March 1987 so that they may be installed while the roadway is under construction. Drawings of the GWMP VCC have been provided to Mr. Michael Weber.

2. NBPO can assist you with CCTV requirements for the New Headquarters Building and with those systems that tie into the Visitor Control Centers. At this time, however, we do not have the necessary level of detail to meet your requirements. For the systems being installed in the New Building, we require detail drawings showing each CCTV location and position above the floor. For those systems that tie into the VCC's, we need a detail drawing showing your required conduit runs and how and where the conduit will tie into the guard houses. The Route 123 VCC is near completion and the CCTV system for this area may have to be installed after the center is occupied. The GWMP is currently under construction and we request details of your requirements for this center by 23 March 1987 so they may be incorporated into the current construction.
